Object	HOME OF FIFA Zürich
Project	Heating and cooling system for acclimatised ceilings

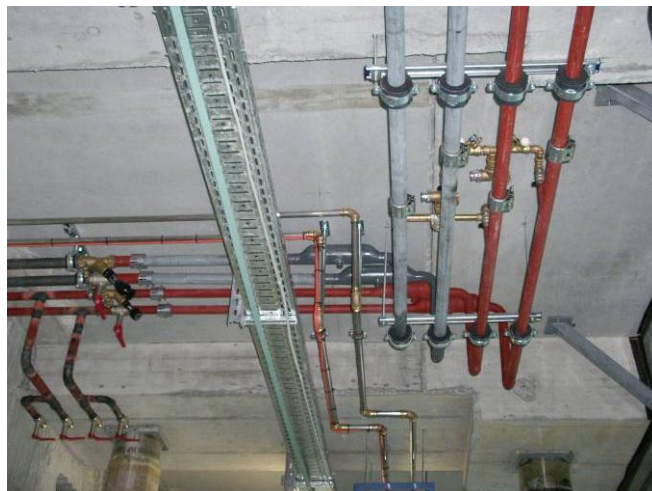

Situation:	The whole construction is built as a glazed version. Welding therefore was forbidden → prefabricated piping to be connected on site.
Solution:	STRAUB-GRIP-L
Customer benefits:	Simple, quick and efficient installation. Compensation of angular deflection when installing pipework.

Project „ HOME OF FIFA „

The acclimatised ceiling (still in structural work) serves as a heating or cooling of offices.

Supply lines beneath ceiling.

Supply line connected to a heating and cooling system.

Glas cladding on the „HOME OF FIFA“
